**VERSION WITH MARKINGS TO SHOW CHANGES MADE**

**IN THE CLAIMS:**

The claims were amended as follows:

17. (Twice Amended) A telephone information apparatus comprising:  
telephone line connection;  
a speech recogniser for recognising spoken words received via the telephone line  
connection, by reference to one of a plurality of stored sets of recognition data;  
and  
means responsive to receipt via the telephone line connection of signals indicating the  
[original or destination] origin of a telephone call to access stored information  
identifying one of the sets of recognition data and to supply this set to the  
recogniser;  
wherein the stored sets correspond to different languages or regional accents.

18. (Twice Amended) A telephone information apparatus comprising:  
telephone line connection;  
a speech recogniser for recognising spoken words received via the telephone line  
connection, by reference to one of a plurality of stored sets of recognition data;  
and  
means responsive to receipt via the telephone line connection of signals indicating the  
[original or destination] origin of a telephone call to access stored information  
identifying one of the sets of recognition data and to supply this set to the  
recogniser;

wherein at least two of the sets correspond to the characteristics of different types of telephone apparatus.
